II. The following errors have been found since publication of the report:

- In Figure 6.1 on page 99, Hungary and Denmark are mistakenly classified in the group with a maternal mortality ratio of 9.9 per 100 000 live births or over. Hungary's MMR is 7.4 per 100 000 and Denmark's is 9.3 per 100 000. The data in Table 6.1 are correct.
- The gestational age data from the Czech Republic were shifted over by one week of gestation and the preterm birth rate is overestimated. The rate should be 7.0% and not 12.2%. This change affects text in the executive summary (page 12) and the description of indicator C5 (page 128) as well as Figures 7.10 and 7.11.
- The EUROCAT congenital anomalies rates for Malta in Table 9.3 on page 171 are displaced by one cell in the table such that data are not under the right headings.
- On page 31, "UK Northern Ireland: Neonatal Intensive Care Outcomes and Evaluation (NICORE)" should read UK Northern Ireland: Neonatal Intensive Care Outcomes Research and Evaluation (NICORE)
- In Appendix A1, the name of the Italian institute of statistics should be Istituto Nazionale di Statistica (ISTAT) and not Sociali Istituto Nazionale di Statistica.
