

european standards of
care for newborn health

EFCUNI

Data collection and documentation TEG

Nicholas Lack, Ph.D., Munich

Topic Expert Groups

- 1. Data collection and documentation**
2. Birth and transport
3. Follow-up and continuing care
4. NICU Design
5. Medical treatment and clinical practice
6. Ethical decision making and palliative care
7. Nutrition
8. Education and training of the multidisciplinary team working in neonatology
9. Patient safety and hygiene
10. Infant and family-centered developmentally supportive care
11. Care procedures

Data collection and documentation

Focus

- Established data bases
- Hospital Benchmark
- International comparisons
- Indicator standards
- Parent's demands
- Other TEG standards

TEG Motivation

- eNewborn, PERISTAT
- Increasing demand
- Interpretation
- Reliable, valid, objective, ...
- Typically overlooked

Challenges

1. Accessibility of data
 1. Not all relevant data regularly available
 2. Need for efficient proxy measures
2. Comparability of data
 1. Registration procedures
 2. Definitions
 3. Expectations of health care

Outlook

1. Develop links with and create standards for European and international data bases to be able to implement studies on quality of care with "comparable" data
2. Close collaboration with other TEGs to see how formal requirements match up to actual application

Thank you very much for your attention!
